Hey all I own a netlabel and have hours of music online for free download. For my next project I want to take a lot of this music and have remixes made to be rapped over. I know lots of hip-hop artists down here in New Orleans but am looking for someone to remix the songs. I have loads of material to work with and master tracks for much of it.

Check it out:

an electronic album that's hurting for a rap remix:

Hit me up if you're interested in remixing or spitting rhymes or releasing anything (no really, anything) on my label.
